PREFACE

We are delighted to present this edited volume, published in connection with the Two-Day National Seminar on "Foresight in Unified Technology & Sustainability for Uplifting Resilient and Environmental Prosperity (FUTURE – 2030)" organized by the Centre for Futures Studies, The Gandhigram Rural Institute – DTBU, Gandhigram, held on 09th & 10th December 2025.

This edited book stands as a scholarly contribution that brings together diverse research papers received from universities and academic institutions across the country, reflecting multidisciplinary perspectives, innovative insights, and research-driven solutions aligned with sustainable development and resilient environmental futures.The seminar received an overwhelming academic response from researchers, academicians, scientists, industrial experts, and students committed to advancing sustainability, green technologies, environmental health, resource management, and inclusive growth. All the papers submitted underwent a rigorous review process to ensure academic integrity and quality. The selected articles in this publication present empirical studies, theoretical analyses, case-based explorations, and forward-looking frameworks that collectively contribute to the shared vision of Viksit Bharat 2047, NEP 2020, and the United Nations Sustainable Development Goals.

This edited book aims to serve as a valuable reference for scholars, policymakers, and practitioners working toward sustainable futures. It reflects collaborative academic spirit and the unified efforts of contributors who share a commitment to knowledge creation and societal transformation.

We extend our sincere gratitude to the esteemed Chief Patron, Patron, Convener, Distinguished Speakers, Advisory Committee, Reviewers, and the Organizing Team whose relentless support made this publication possible. We also express heartfelt appreciation to all the authors for their meaningful academic contributions. Without their dedication and scholarly engagement, this volume would not have taken shape.

We hope that this publication inspires further research, partnerships, and innovative practices that pave the way for resilient, prosperous, and sustainable communities.
